

CMS Provider Enrollment Moratoria:

What It Is, Why It Matters, and What Agencies Need to Know

CMS uses enrollment moratoria as a targeted strategy to protect Medicare from fraud, waste, and abuse in high-risk areas.

In 2026, CMS extended enrollment moratoria affecting selected provider and supplier categories in specific regions through **December 31, 2026**.

WHY MORATORIA EXIST

Combating Fraud, Waste, and Abuse

Moratoria help prevent fraudulent enrollments by limiting activity in high-risk areas.

Protecting Program Integrity

They strengthen Medicare's integrity and ensure resources support legitimate patient care.

Focusing on High-Risk Areas

Moratoria are applied only to specific regions and provider types based on risk assessments.

Temporary by Design

Moratoria are reviewed regularly and may be lifted, modified, or extended based on ongoing evaluations.

HOW MORATORIA IMPACT AGENCIES

If your provider type or service area falls within an affected region, certain enrollment actions may be restricted, including:

- ✓ New Medicare enrollments
- ✓ Changes of ownership
- ✓ Revalidations in impacted circumstances
- ✓ Certain provider and supplier applications

Always verify whether a moratorium applies to your situation before submitting any request.

WHAT AGENCIES SHOULD DO

VERIFY ELIGIBILITY BEFORE APPLYING

Confirm enrollment eligibility through CMS and PECOS before starting your application.

MONITOR CMS UPDATES

CMS regularly publishes updates on active moratoria, affected regions, and provider categories.

MAINTAIN ACCURATE DOCUMENTATION

Keep all enrollment records, licenses, certifications, and supporting documents current and accurate.

SEEK EXPERT GUIDANCE

Enrollment requirements are complex—work with experts to reduce risk and improve outcomes.

STAYING AHEAD OF REGULATORY CHANGES

Proactive compliance starts with staying informed. Agencies that monitor CMS updates, maintain accurate records, and plan ahead are better positioned for long-term success.

SOP Support helps care agencies build strong operational foundations through **compliance-focused websites, growth systems,** and ongoing support.
